OSHA 2020 Webinar

What's in Store for Next Year?

NECA is hosting a free webinar on Tuesday, December 3rd at 11am to discuss OSHA's regulatory agenda and what it means for the electrical construction industry in 2020.

SUNY Delhi NECA Student Chapter Update

The SUNY Delhi NECA student chapter has been busy at work since their new semester started in September. The chapter meets every Monday night at 6pm to discuss their agenda and participation in various school and community events. Kenney Gardner, Membership Organizer for Local 325, attended their meeting on October 28th to tell the students about the many advantages to the apprenticeship program.

The students recently volunteered and spent their Saturday helping a local citizen with various yard and electrical projects. The student chapter is currently looking for more volunteer opportunities in their area.

EDUCATIONAL SPOTLIGHT

On Demand Project Management

The project manager is an essential part of every electrical construction project. Project managers must determine how to effectively plan, organize and schedule and how to efficiently use labor, subcontractors, materials, time, installed equipment, budgets, construction equipment and company money. They must act as a conduit for information and have great communication skills.

To help new project managers moving into their role, NECA has created a **project management program** consisting of thirty short courses that cover the topics all project managers need to know to be successful.

Access the courses now through the NECA learning Center:
