National Fall Stand-Down

Fatalities caused by falls from elevation continue to be a leading cause of death for construction employees, accounting for 320 of the 1,008 construction fatalities recorded in 2018 (BLS data). Those deaths were preventable.

The National Safety Stand-Down raises fall hazard awareness across the country in an effort to stop fall fatalities and injuries. The seventh annual National Safety Stand-Down to Prevent Falls in Construction will be held May 4-8. Visit the [OSHA Stand-Down page](#) for ideas on how your company can participate.
